Product Overview

Composition (per tablet):

Calcium Carbonate I.P.

1250 mg

Essential for bone density and strength

Vitamin D3 I.P.

2000 IU

Enhances calcium absorption

Methylcobalamin I.P.

1500 mcg

Active form of Vitamin B12

L-Methylfolate

1 mg

Bioactive folate form

Pyridoxal-5-Phosphate

0.5 mg

Active Vitamin B6

Key Features:

- High-strength calcium with Vitamin D3 support
- Neurotropic vitamins (B12 + Folate + B6) for nerve regeneration
- **Dual action: Bone + Nerve care in one tablet**
- Prevents osteoporosis, fractures & neuropathy together

Calcium-Carbonate Vitamia Ds
MethyLotealbrain L. MethyHobrite
Calcium & Pyndanal 5-Phosphate

Calcirix-XT 

Role of Key Ingredients

Calcium Carbonate (1250 mg)

Builds bone density and prevents osteoporosis. Essential mineral for maintaining strong skeletal structure and preventing fractures in vulnerable populations.

Vitamin D3 (2000 IU)

Boosts calcium absorption and improves bone mineralisation. Critical for optimal calcium utilisation and maintaining healthy bone metabolism.

Methylcobalamin (1500 mcg)

Regenerates nerves and reduces neuropathic pain. The most bioactive form of Vitamin B12 for optimal neurological function and nerve repair.

L-Methylfolate (1 mg)

Active folate form essential for DNA synthesis and neurological support. Bypasses metabolic barriers for superior bioavailability and effectiveness.

Pyridoxal-5-Phosphate (0.5 mg)

Active Vitamin B6 supporting neurotransmitter function and homocysteine metabolism. Essential for proper nerve signalling and cardiovascular health.

Indications

Calcirix-XT Tablets are recommended for:

- Osteoporosis & Osteopenia**
Prevention and treatment of bone density loss, particularly in post-menopausal women and elderly patients at risk of fractures.
- Post-menopausal Bone Weakness**
Addressing hormonal changes that lead to accelerated bone loss and increased fracture risk in menopausal women.
- Diabetic Neuropathy & Peripheral Nerve Pain**
Managing nerve damage and pain associated with diabetes through targeted neurotropic vitamin supplementation.
- Vitamin D & B12 Deficiency**
Correcting nutritional deficiencies that impact both bone health and neurological function.
- Post-fracture Recovery & Bone Healing**
Supporting optimal bone repair and regeneration following fractures or orthopaedic procedures.
- Chronic Fatigue & Neuro-musculoskeletal Disorders**
Addressing complex conditions involving both bone weakness and neurological symptoms.

Clinical Advantages

Key Benefits of Calcirix-XT:

Dual-Action Formula

Strengthens bones whilst protecting nerves in a single, comprehensive tablet formulation.

Superior Absorption

Higher Vitamin D3 (2000 IU) ensures superior calcium absorption and bone mineralisation.

Neuroprotective Complex

Advanced combination of B12, Folate, and B6 effectively reduces neuropathic pain and supports nerve regeneration.

Enhanced Compliance

Complete formulation in one tablet improves patient adherence and treatment outcomes.

Trusted Therapy

Proven effectiveness for osteoporosis with associated neuropathy in clinical practice.

Comparison with Other Supplements

Parameter	Calcirix-XT (Bone + Neuro)	Calcium + Vit D3	Neuro Vitamins Alone
Bone Strength	✓ Excellent	✓ Moderate	✗ Absent
Nerve Health	✓ B12 + Folate + B6	✗ Absent	✓ Strong
Fracture Prevention	✓ High	✓ Moderate	✗ None
Comprehensive Care	✓ Complete	✗ Limited	✗ Limited

Calcirix-XT provides unmatched comprehensive care for both bone and nerve health

Dosage & Administration

Standard Dosage

1 Tablet once daily after meals

Or as directed by the physician

Hydration

Ensure adequate hydration

Take with sufficient water for optimal absorption

Important Note

Avoid taking with bisphosphonates

Space administration to prevent interaction

Administration Tips: Take consistently at the same time each day for optimal therapeutic benefit. Food intake enhances absorption and reduces gastric irritation.

Safety & Tolerability

Generally Well-Tolerated

Possible Side Effects:

- Mild gastric upset or constipation (rare)
- Rare: hypercalcaemia (with overdose)

Contraindications:

Hypercalcaemia

Or Vitamin D toxicity

Severe Renal Impairment

Reduced kidney function

Known Hypersensitivity

To any ingredients

- ⊗ **Important:** Regular monitoring of serum calcium levels is recommended during prolonged therapy, especially in patients with renal impairment or those taking other calcium supplements.

Why Prescribe Calcirix-XT?

Doctor's Choice For:

Superior Bone Strength

High-dose calcium combined with optimal Vitamin D3 for maximum bone density improvement and fracture prevention.

Comprehensive Neuro Support

Advanced neurotropic vitamin complex (B12 + Folate + B6) for effective nerve regeneration and neuropathy management.

Dual Prevention

Simultaneously prevents fractures and reduces neuropathic pain, addressing multiple patient concerns with one prescription.

Patient Convenience

One tablet covers both bone and nerve health needs, improving compliance and treatment outcomes.

Reliable Quality

Trusted formulation from Human Orthocare, ensuring consistent therapeutic efficacy and patient safety.
